

CAREER DEVELOPMENT

Career development is the process of learning and applying short-term skills to improve towards long-term career goals. It usually involves consistently hitting benchmarks unique to your chosen job path.

1st Career Talk by Alumni Habib

- mainly focusing on how to write a proper CV's to be used for internship or work application's purposes
- He advised us to choose an useful extracurricular activities to involve on to improve softskills and leadership skills
- He also share his own experience as an UTM average's student at first then becoming as top student.

2nd Career Talk by Industry(PPG))

- PPG briefed us on their company's overview or summary of a business.
- They also explained to us on career's that can we pursue in their company as a Computer Science (Data Engineering)'s graduate
- PPG listed few criterias that must-have on every student to ensure they became and enrolled employee not only for their company but also others.

REFLECTION

- I have gained so many useful input especially to create as early as possible LinkedIn account's to put on interesting activities that I have joined or achievement that I gained during studies.
- He also shared on useful activities that we can join as first or second year student to enhance and boost our CV's input quality. As far as I know, we do not need to be active on all college or faculty's activities but we must choose the one that are related to our study scope area (for example: coding competition and database workshop)

- The most highlighted information that I get is "what is the criteria that I must have to increase my employability rate."
- Communication, teamwork and problem solving is the main skills that I am looking for to improve in myself in order for me to be a quality graduate.
- Be able to communicate, present and work in English language is my main concern for now as they mentioned PPG's company are worldwide company that require us to speak fluently to communicate with customers around the globe.

INSPIRATION

- Speech by our respective alumni, Habib has motivates me to always become a hardworking student no matter the people who are disturbing you on surroundings because you do you.
- His career in IT also have motivates me to start on as low position at first to learn and gain many useful experience in order to achieve respected position one fine day.

- PPG' speech by my course's alumni have make me clear on practising software that I need to improve in order for me to fulfill company's jobscope. They mentioned software like SQL and C++ is the one that I need to master it before entering internship or working phase.
- On top of that, I'm also amazed on english communication skills that they have when giving the speech. Dr. Aryati also told us in class that they used to be awkward in giving speech/presentation back then but a lot of practices have make them better now.
